Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tagami et al (5,889,483).

-As per claim 1, see figure 2 and col. 2, line 56 to col. 4, line 43, Tagami et al discloses a system comprising:

addition means (10, 11, 12) for receiving a 1-bit digital signal produced by encoding an analog signal by delta sigma modulation (see col. 3, lines 16-20 and 39-41) and taking the sum of said 1-bit digital signals of a given number of samples applied immediately before (see col. 2, lines 63-67;

first decision means (12) for making a decision as to whether said analog signal has a zero value based on the output value from said addition means and for producing a first output signal "instruction of count-up" (see col. 4, lines 13-17); and

second decision means (13, 14) for producing a second output signal indicating that said

Art Unit: 2631

analog signal assumes a zero value when said first decision means keeps delivering said first signal for a given period of time (300 msec) (see col. 4, lines 18-43).

-As per claim 2, Tagami et al discloses that said number of samples corresponds to N (N=1) times the number of bits (=8) of a repeating pattern ("11001100") and appearing in said 1-bit digital signal, correspondingly to said delta sigma modulation, when said analog signal assumes a zero value (see col. 3, line 65 to col. 4, line 4).

Allowable Subject Matter

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Phu whose telephone number is 571-272-3009. The examiner can normally be reached on M-F (6:30-2:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mohammad Ghayour can be reached on 571-272-3021. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
